Multiple-Aptitude Test

The ASVAB test covers eight areas including science, word knowledge, mathematics, and mechanical comprehension. It assesses a student's ability to learn new skills and is a predictor of success in training and education programs.

Interest Inventory

The FYI is a 90-item interest inventory based on John Holland's widely accepted theory of career choice. When students complete the FYI, they have three interest codes to use with the OCCU-Find for career exploration.

Career Exploration Tool

The OCCU-Find contains 1000+ occupations sorted by interest codes so students can identify the occupations that match their personal interests.

The Program and The Military

- Schools determine whether student information is released to the military or not.
- The program is administered by civilian Education Services Specialists who have no recruiting function.
